PROFILE

A passionate and detail-oriented Frontend Developer with 1 year of professional experience at Deeporion Technology Pvt. Ltd., specializing in creating dynamic, userfriendly web applications using React.js, Redux, and Tailwind CSS. Proficient in both functional and class components, I have successfully delivered company projects and personal initiatives, showcasing a strong command of modern web development technologies.

WORK EXPERIENCE

Deeporion Technology Pvt. Ltd.
- Developed and maintained the company's website using React.js, Redux, and Tailwind CSS, ensuring responsiveness and optimal performance.
- Collaborated with cross-functional teams to design and implement scalable and reusable UI components.
- Utilized both functional and class components to build feature-rich and efficient web applications.
- Resolved performance bottlenecks and ensured seamless user experiences.

PROJECTS

John Kenemore: - Quote Builder -
Project Description: Sales representatives from different retail companies will fill out surveys at distribution centers/warehouses to determine needs for a quote. Each user should get multiple quotes and solutions based on the information entered automatically through the application in the survey. Whatever possible equipment combinations that can be used should be included in the quotes.

Street Smarts:-
A website where users can purchase programs and courses.
Programs and courses are made by the admin user and are displayed to the regular user.

Internal Project:-
For their professional needs, the organization undertook this internal project. It features three user portals: client, admin, and employee.

Ecommerce Website:-
Technologies: React.js, Node.js, Redux, Material-UI
Description: A fully functional ecommerce platform with features like product catalog, cart management, and order processing.

OMNI Food Website
Technologies: HTML, CSS, JavaScript
Description: A modern and responsive website for showcasing a food delivery service, focusing on UI/UX design and performance.

ACHIEVEMENTS

- Successfully delivered high-quality projectswithindeadlines, receiving commendation from supervisors.
- Recognized for optimizing code and enhancing application performance across various projects.
